What's In A Phone Number?

ABOUT THE FIRM

Who called me? When your call back message gives a telephone number only - or includes a common surname such as Jones, Smith, Brown etc. - the Numerical Telephone Locator will assist in determining correct firm name. Make use of both Alphabetical and Street Guide Information to

establish names of officers, owners or partners, products and services, and correct address. Properly identify firm and caller and have necessary records, files or correspondence on hand before returning call.

ABOUT THE INDIVIDUAL

Who called me? When only a telephone number is

known, the Numerical Telephone Locator will assist in determining the name of the individual - this information combined with other sections of your City Directory will quickly establish such information as wife's name, place of employment, title, home address, business address and other necessary information.

What to tell the babysitter?

When you know that she knows where you can always be reached by phone, you'll have a better time. Even if you're planning to be two or three places during the evening, it's a good idea to write down the names of the places, the

phone numbers, and the approximate times you'll be there.

Taking this precaution is a *very simple* matter—and it's one way that your telephone can make a *night out* just that much more pleasant.
